

Ivan Ivanov

Senior Frontend Engineer / Team Lead

Current location: Bulgaria, Sofia
Email: ipivanov11@gmail.com
Phone Number: +359883327424
Date of Birth: 1984-11-22
Place of birth: Sofia, Bulgaria
Website: ipivanov.github.io
Github: @Iplvanov
LinkedIn: @ivan-ivanov-aa433529

About Me

I am Front-End Web Developer who is motivated to combine the art of design with the art of programming. My responsibilities are to translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. I am working closely with UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Developing responsive web designs that are suitable for a modern web accessed via many different types and sizes of device, such as TVs, mobile phones, tablets, and desktop computers.

I believe the best design comes from establishing problems specific to a project then solving them in the simplest way possible. I design to achieve the aims of the project and also providing users with a quality experience during their interaction with the product.

Work Experience

05/2019 – Present

Senior Frontend Engineer / Team Lead, Axilion, Sofia, Bulgaria

We enable cities around the globe to reclaim their traffic-congested streets by harnessing advanced AI technology that transforms traffic signals into a dynamic and adaptive traffic network. Once implemented, travelers experience smoother travel with more green waves, resulting in up to 40% reduced commute time and substantial reduction of emissions.

Achievements/Tasks

- Implementing new features
- Expanding and improve current features of the applications
- Organize the frontend team in the agile/scrum environment
- Define and follow rules for best practices
- Organize CI and CD of the frontend products
- Support the other members of the team
- Introduce newcomers to the product and working environment
- Define and follow the process of code reviews and git flow
- Participate in interviews for the new employees
- Research and propose for the newest and best applicable technologies

05/2017 - 05/2019

Senior Software Developer / Team Lead, Fourth, *Sofia, Bulgaria*

At Fourth, we work every day to create products that enrich people's lives at hospitality. Our Platforms makes it possible for people around the world to easily access their schedule and salary content on their devices while their managers don't waste half of the working time in paperwork. Creating high-quality, elegantly designed user-facing web applications, beautifully written, documented and thoroughly tested code.

Achievements/Tasks

- Implementing new features
- Expanding and improve current features of the applications
- Follow the process of clean code and best practices
- Follow the process of code reviews and git flow
- Follow strictly CI and CD

07/2016 - 05/2017

Front End Developer / UI Developer, Ontotext, *Sofia, Bulgaria*

Here at ontotext i am part of GraphDB team which in short provide tools to manage and operate with rdf database more info here: <http://graphdb.ontotext.com/>. More specific i am responsible of app which is based on angular. This app with its API provides to the user useful features and helps him to manage his datasets. My main responsibilities are optimizing those feature if it's needed and integrate new one. This includes writing new modules with their templates, controllers, css visualizations, e2e tests and etc.

Achievements/Tasks

- Implementing new features
- Expanding and improve current features of the applications

11/2014 - 07/2016

Front End Developer, MusalaSoft, *Sofia, Bulgaria*

Main responsibility as a Front End Developer is for the production, modification and maintenance of websites and web application's user interfaces. This involves working closely with designers, in using semantic mark-up language i.e. HTML/XTMTL/CSS, to turn their static Photoshop designs into working browser based web pages. I also work closely with server-side developers to implement their server-side code in order to develop complex, interactive and database driven websites. Generally, I am working with an off-the-shelf or bespoke CMS and work closely with the designers to integrate designs seamlessly into the chosen technology.

Achievements/Tasks

- Implementing new features under supervision
- Expanding and improve current features of the applications under supervision

01/2012 - 10/2014

Construction Engineer, Monolit3, *Sofia, Bulgaria*

Education

Period: 09/2018- 06/2020	Degree Title: Master's Degree Computer Science 2 Years	Institution/ School: Software University Sofia
Period: 09/2003- 06/2008	Degree Title: Master's Degree 5 Years	Institution/ School: UASG (University for Architecture, Civil engineering and Geodesy) – Sofia, Bulgaria

Languages

English - Professional Working
Bulgarian - Native or Bilingual

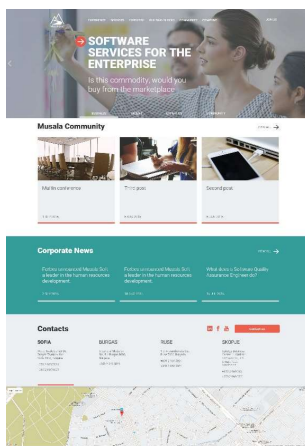

Technical skills

- ❖ JavaScript/ES6
- ❖ HTML
- ❖ CSS/Sass/Less
- ❖ React/Typescript
- ❖ React-Native
- ❖ Ember

- ❖ JQuery
- ❖ AngularJS
- ❖ Angular2/Typescript
- ❖ MongoDB
- ❖ Express
- ❖ Git
- ❖ WordPress
- ❖ PHP / MYSQL
- ❖ NodeJS
- ❖ Jenkins
- ❖ Docker
- ❖ C#

Portfolio

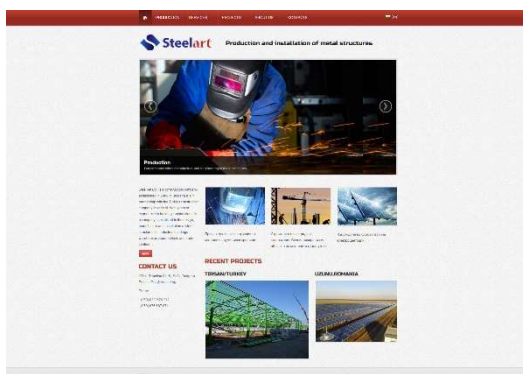

Some of my selected works:

MusalaSoft corporate website

This is my leading project at MusalaSoft.
